## Busylight UC™ for Microsoft Lync PRESENCE & CALL ALERT

### Bring presence to the office

Busylight UC displays the current presence state in Lync with the colours red, yellow, green and purple.

**Why?** To avoid interruptions by making colleagues in the office aware of the Lync presence states, especially "Busy" and "Do Not Disturb".

#### Never miss a call on Lync

Busylight UC rings/flashes at incoming calls on Lync.

Why? Many computers have no speakers connected and if users are not wearing their headset they do not hear the ringing.

#### Silence the ringtones

Mute the ringtone and use silent flashes at incoming calls on Lync.

Why? To avoid noisy ringtones in open-plan offices. And to be able to determine the call from a distance.
